EDUCATION

Marathwada Mitra Mandal Institute Of Technology, Pune
Bachelor's of Engineering, Computer Engineering

2020-2024
CGPA-7.16

TECHNICAL SKILLS

- **Interests and Domain:** Java Fullstack development
- **Languages and Frameworks:** Java, C, HTML/CSS, Javascript
- **Frameworks:** React, Spring, Spring Boot, Servlets, JSP
- **Databases and QL:** SQL, MySQL, MongoDB, Neo4j
- **Tools and Infrastructure:** Postman, Git, GitHub and Agile Methodologies

WORK EXPERIENCE

- **Software Developer Intern | Numetry Technologies** **Mar 2024 – Presents**
 - Worked in the **Backend Development team** focusing on Spring Boot, Hibernate and Mysql technology.
 - Developed a Login Registration Authentication API with full functionality for user and admin access.
 - Implemented a single login portal where admins access the admin dashboard using their office-provided email, while users access their dashboard using their respective user emails.
 - Collaborated with team members to ensure seamless integration of the API with existing systems.
 - Participated in code reviews and debugging sessions to maintain code quality and resolve issues promptly.

ACADEMIC PROJECTS

- **Cloud web App | React, JSON, Tomorrow.io API, Geocoding, Springboot**
A webpage allows users to search for weather information anywhere in the world or current location and for any past date.
- **Recharge web application | HTML/CSS, Servlet, JSP**
A user-friendly recharge web application leveraging HTML/CSS, Servlet, and JSP technologies for seamless online mobile number recharges with integrated payment processing.
- **Note IT / notes-taking web app | React, Spring-Boot**
A Note IT web application for taking and managing notes, developed using React for the frontend and Spring Boot for the backend, offering a seamless user experience.
- **ChatGPT Project Chat Web App with GPT | React**
A ChatGPT project chat application built with React, integrating the GPT (Generative Pre-trained Transformer) model for intelligent conversational interactions.
- **EHR System For Smart Ambulance | HTML/CSS, Javascript, Servlet, JSP, Google Map API**
An Electronic Health Record (EHR) system tailored for smart ambulances, employing HTML/CSS, JavaScript, Servlets, JSP, and Google Maps API for efficient patient data management and real-time navigation.
- **Map-pharma | React, Spring-Boot, Google Map**
A comprehensive web application developed with React for the frontend and Spring Boot for the backend, integrating Google Maps API to facilitate easy location-based search and navigation for pharmacies.
- **Honey word Detection | React, Springboot, Mysql**
Honey word Detection: An advanced security application utilizing React for the frontend, Spring Boot for the backend, and MySQL for data storage, designed to detect unauthorized access attempts through the implementation of honey words.

EXTRACURRICULAR

- Participated in Linkcode Technology Webathone.
- .Participated in PW Coding Contest
- Workshop attended: Internet of Things, Cyber Security, ReactJS

CERTIFICATES

- Java basic
- Java full-stack development
- Javascript
- Responsive Web Design
